Re: RoHS/WEEE Compliance

To Whom It May Concern:

It is important to AAA Products International to meet or exceed any environmental legislation whether implemented locally, nationally or internationally. Every process under our control is free from the use of banned or controlled substances.

This letter is concerning recent changes in the European Union and the restrictions of hazardous materials (RoHS Directive 2002/95/EC and WEEE Directive 2002/96/EC).

Restricted (RoHS) Materials:

1. Quantity limit 0.1% of weight
 - a. Lead (Pb)
 - b. Mercury (Hg)
 - c. Hexavalent Chromium (Cr VI)
 - d. Polybrominated Biphenyls (PBB)
 - e. Polybrominated Diphenyl Ethers (PBDE)
2. Quantity limit 0.01% of weight
 - a. Cadmium (Cd)

AAA Products International confirms that since the enforcement of RoHS/WEEE on July 1, 2006 most products were and continue to be delivered to meet or exceed the requirements in accordance with the RoHS/WEEE directive. The only potential non-compliant component we manufacture is the *Jiffy*-Tap lead screw nut. This nut is made from a copper alloy that contains between 0.4-3.0 percent lead by weight, however, this material is exempt from RoHS/WEEE under exemption 6.

We will continue to monitor external suppliers for compliance of legislation concerning RoHS Directive 2002/95/EC, WEEE Directive 2002/96/EC.

Where a customer has specified a particular added value item that cannot be designated as RoHS/WEEE compliant, we will continue to advise compliance and assist in recommendations for compliant alternatives.

Sincerely,

Harry Womack
President
